What Will You Learn?

While completing the Infant Nutrition LMS course and this associated guidebook, you'll learn the basics of infant nutrition, family meals, physical activity, and dental health.

Items Needed for This Course

- Pen or pencil
- Access to the Infant Nutrition LMS course

Recommended Time

- Approximate time it takes to complete the Infant Nutrition LMS course: 1-2 hours
- Approximate time it takes to complete the face-to-face activities and discussion with your trainer: 1-2 hours

Things to Remember

- This guidebook is yours to keep.
- You are encouraged to take notes, highlight, and write in the guidebook.
- As your trainer chooses, you may work in a group or as an individual.
- You are encouraged to ask your trainer(s) for help, ask questions about the information in the course, or ask any questions about additional topics related to infant nutrition training.

Infant Nutrition Course Instructions

- □ Log onto https://nvwic.instructure.com/login/canvas
- □ Open and complete all modules of the Infant Nutrition LMS Course and the corresponding Infant Nutrition Activities in this guidebook.
- At your trainer's direction, complete the Infant Nutrition LMS Course and guidebook, either individually, with other trainees, or with your trainer.
- □ Complete the Infant Nutrition LMS Course Post-Test
- Meet with your trainer at their direction to discuss each module of the Infant Nutrition LMS Course and the associated activities in this guidebook, either after each module or after all modules have been completed.

Module 1: Young Infant Nutrition (Birth to 6 Months)

MODULE 1 COMPETENCIES:

- 1. Trainees will be able describe the Division of Responsibility for Young Infants to caregivers.
- 2. Trainees will be able to list infant hunger and fullness cues.
- 3. Trainees will be able to describe the potential problems of adding cereal to bottles to caregivers.
- 4. Trainees will identify appropriate recommendations for storing breastmilk and formula.

Module 1 Questions:

1. How would you explain the Division of Responsibility for Young Infants to caregivers?

2. Complete the table below by listing hunger/fullness cues that infants use to indicate that they need to be fed, or are done eating.

Hunger Cues	Fullness Cues
1)	1)
2)	2)
3)	3)
4)	4)

3. How would you explain to caregivers of infants less than 4 months old, the potential problems of adding cereal to bottles?

4. Complete each table below to indicate how long formula and breastmilk can be safely stored before being discarded.

TABLE 1: FRESHLY PUMPED OR PREPARED BREASTMILK OR FORMULA

	Room temperature (freshly pumped or prepared)	Refrigerated (freshly pumped or prepared)	Frozen
Breastmilk			
Powdered Formula			N/A
Concentrated Formula			N/A
Ready-to-Feed (RDF) Formula			N/A

TABLE 2: THAWED BREASTMILK OR FORMULA (OR LEFTOVER FROM A FEEDING)

	Room temperature (Thawed)	Refrigerated (Thawed after frozen storage)	After feeding has begun (baby did not finish the bottle)
Breastmilk			
Powdered Formula	N/A	N/A	
Concentrated Formula	N/A	N/A	
Ready-to-Feed (RDF) Formula	N/A	N/A	

Module 2: Older Infants-Young Toddlers Nutrition (6 to 18 Months)

- 1. Trainees will be able describe the Division of Responsibility for Older Infants and Young Toddlers.
- 2. Trainees will identify appropriate ages to include their infants in family meals.
- 3. Trainees will be able to explain the importance of family meals.
- 4. Trainees will be able to offer recommendations to caregivers about introducing infants to family meals.
- 5. Trainees will describe signs of developmental readiness associated with the 4 stages of solid food progression during infancy.
- 6. Trainees will be able to offer recommendations to help caregivers prevent choking hazards for infants.
- 7. Trainees will correctly identify the 8 most common allergenic foods.
- 8. Trainees will be able to offer evidence-based recommendations about introducing allergenic foods to older infants and young toddlers.
- 9. Trainees will correctly identify the symptoms of food allergies.

Directions:

Answer the following questions.

1. What is the Division of Responsibility for Older Infants to Young Toddlers?

2. When would caregivers ideally begin to bring older infants and young toddlers to eat alongside other family members during meals and snacks?

3. Describe why family meals are important.

4. What advice would you offer to a caregiver who has never offered family meals and snacks, but is interested in starting.

5. Match each letter of developmental skills with its corresponding step of solid food progression.

Four Steps of Solid Foods	Developmental Skills
Step 1 Pureed Foods	 D. Skills: Close their lips around the rim of a cup Pick up food and put in their mouth Takes bites off of food, and Chew foods, but occasionally gag
Step 2 Thicker, Lumpy Food	B. Skills: Sit up alone or with support Open their mouth for the spoon Close their mouth over the spoon Keep most of the food in their mouth Swallow
Step 3 Finger Foods	C. Skills: Use their fingers (not entire hand) to pick up food Can consistently chew and swallow foods without gagging

Step 4 Easy-to-chew Grown-up Foods	 D. Skills: Pick up food, but cannot let it go Keep food in mouth instead of swallowing right away Move food to the side of their mouths Munch on food
---------------------------------------	---

6. What advice would you offer to WIC participants to prevent choking hazards?

7. List the 8 most common food allergies.

1.	2.
3.	4.
5.	6.
7.	8.

8. What advice would you offer to a caregiver regarding the introduction of common allergenic foods to a child without any history of eczema or food allergies?

9. Briefly explain how a caregiver can recognize symptoms of a food allergy.

Module 3: Healthy Eating Recommendations

MODULE 3 COMPETENCIES:

- 1. Trainees will be able to explain the Division of Responsibility in Physical Activity for infants.
- 2. Trainees will be able to share recommendations about appropriate physical activities for infants.
- 3. Trainees will offer appropriate recommendations to caregivers about maintaining good oral health both during and after the eruption of teeth, and how to prevent baby bottle tooth decay in older infants and young toddlers.

Module 3 Questions:

1. How would you describe the Division of Responsibility in Physical Activity for Infants to caregivers?

2. Match the letter of the age range with the recommended way that caregivers can encourage physical activity.

Age Range	Recommended Way for Caregiver to Encourage Physical Activity
11 to 15 Months	A. Caregivers hold infants up and encourage them to reach for things.
Around 6 Months of Age	B. Caregivers put infants on their stomachs to practice moving.
By 4 Months of Age	C. Caregivers can encourage crawling and pulling to stand by placing objects just out of the infant's reach.
Newborns	D. Caregivers provide safe places for infants to practice walking.

	Infant Nutrition Guidebook	Nevada WIC Training	Trainee Edition	
	E. Caregivers make sure infants have safe places to practice			
7 to 10 Months	sitting up on their ow	n.		

3. How should infants' oral health be maintained before their first teeth erupt?

4. How should infants' oral health be maintained after their first teeth erupt?

5. How can Baby Bottle Tooth Decay be prevented?
